Bing

The current **spot price** for **aluminum** is approximately **$2,240.05 per metric ton** or **$1.03 per pound**[1]. If we convert this to pounds, it's roughly **$0.47 per pound**. Keep in mind that aluminum prices can fluctuate due to market demand, supply, and other factors.

For comparison, let's consider bananas. The average length of a banana is around **7.5 inches**[4]. If we were to stack bananas to represent the price of aluminum, it would take quite a few bananas to match a pound of aluminum!

Remember, this is just a fun comparison, and I recommend checking real-time market data for accurate pricing. If you're looking to sell aluminum scrap, the price may vary slightly, but it's generally in the same range[4].
